

## July 2023

As summer break winds to an end and educators and students prepare for the beginning of a new school year, our R7CC Team is also focused on planning for the fifth year of our work with Alabama, Florida, and Mississippi. Over the last four years, we have developed strong partnerships and relationships with our colleagues in all three states, and we appreciate the opportunity to support them in their ongoing efforts to provide students with high-quality and evidence-informed educational opportunities that will set them up for success in life. We look forward to thought-partnering with these colleagues in Year 5 as we collaborate on how to ensure that the work we have done together is sustainable for the future.

This month, we provide a brief overview of an upcoming blog series on Math Coaching. Recognizing that improved mathematics instruction is critical to overcoming the academic declines caused by pandemic school closures and the sudden change to virtual and hybrid learning models, we hope that this series will be helpful to you as you work to support teachers in strengthening students' conceptual and procedural understanding of mathematics.

We hope you have a great start to the new school year!

Be sure to visit our website and check in with us on social media to keep up with our work. We are honored to continuously support you during these five years.
